Tips to Separate Rubbish

There are some tips on how to separate rubbish at home. The most simple way to separate your rubbish is by categorizing them into two types.

First, you can collect organic rubbish. Examples of organic rubbish are food scrap, leaves, plants and soil. They can go into the composter. They are good to use as fertilizer.

Second, you should collect non-organic rubbish. The materials that belong in this category are paper, plastic, cardboard, metal and fabric. Before we throw them into the recycle bin, we should clean them. Then, they can be recycled into new products.

Separating rubbish is very useful to keep our environment clean.

Tips to Separate Recycling Items

There are many types of items that we can recycle, for example, paper, glass, and styrofoam. Before we put them into the recycle bin, we can think about some tips. Check the tips here.

1. Don't crumple paper
Papers should be put in the recycling bin neatly. If we crumple papers, it is difficult to process them. If the paper is dirty or oily, we can cut them in pieces and put them in the composter.
 2. Wash and separate bottles
Plastic and glass bottles should be separated in the recycle bin. Glass bottles can be reused before we throw them in the recycle bin. If we want to throw them away, we can wash them first. Clean bottles will be easy to recycle.
 3. Clean styrofoam packaging
When we buy food, sometimes they are packed with styrofoam. Before we put them in the recycle bin, we should clean it from the food scraps. We can collect styrofoam in a big group before we throw them away.
- Guru meminta peserta didik melengkapi infografis dengan saran yang sesuai dari teks di atas.
Bahasa guru:
"Complete the infographic with the correct tips for separating recycling items from the text."
